

Idox. Do more.

A photograph of a row of colorful terraced houses (red, yellow, blue, and brick) along a canal at dusk. The houses are reflected in the water, and the sky is a deep blue. The scene is lit by streetlights, creating a warm glow.

# Address Management Solution

An alternative solution to  
Esri's LocatorHub

Manage, maintain and share accurate, up-to-date address data to the British Standard.

## As Esri's LocatorHub approaches retirement, now is the time to deploy a recommended alternative solution

Recommended by Esri as a replacement for LocatorHub, Idox's address management solution on the Aligned Assets platform is perfectly suited to organisations with complex address management needs. Furthermore, it's available as cloud-based or on premise, depending on your requirements.

As an off-the-shelf solution, our software requires minimal bespoke code, and is kept fully up-to-date with changes in technology and data standards, including the forthcoming National Geographic Database – Ordnance Survey's (OS) replacement for AddressBase Premium.

Like LocatorHub, our solution provides much more than a simple address lookup facility.

### What are the benefits?

Provides **national coverage** and regions tailored to your needs, covering 1M+ addresses.

Uses a **complex, rich content dataset** including OS's AddressBase Premium, and the forthcoming National Geographic Database.

**Integrates seamlessly** with Esri's ArcGIS and other systems.

Enables you to **create** and maintain your own or temporary properties and streets.

Provides **pinpoint accuracy**, plus every address is tagged with a **Unique Property Reference Number (UPRN)** and includes the full property life cycle, including provisional, historic and alternative addresses.

Advanced system integration capabilities use **RESTful APIs** and publish services to keep addresses up-to-date across the organisation.

Our search index has multiple nodes, ensuring **resiliency** as well as **load-balancing**.

Achieves **efficiency gains** with super-fast, scalable search capability, able to cope with hundreds of address lookups per second.

## We are trusted by organisations in the public and private sectors

Used by large, complex organisations and national infrastructure projects, our solution delivers accurate addressing and maximises efficiency. We are trusted by organisations across diverse sectors, including utilities, emergency services, local authorities, healthcare trusts, and the Central Switching Service.

**“Idox's address management solution has enabled seamless integration with all our operational systems, ensuring access to a single, accurate set of address data across the whole organisation. From an analytical perspective, using a single address through multiple systems allows analysis to be more efficient and reliable.”**

**Matthew Ella**  
Buckinghamshire Fire and Rescue Service
