CAFM Explorer® in the cloud

Empowering facilities management teams to do more

Facilities managers today grapple with financial pressures, limited IT resources, and the need for flexible working. How can companies meet growing demands for more flexible facilities management (FM) services while maintaining compliance and cost-effectiveness?

CAFM Explorer in the cloud

CAFM Explorer in the cloud takes the feature-rich experience of Idox's market-leading FM software and migrates it to a fully cloud-hosted and managed service. Notably, it serves as a low-cost delivery solution, enhancing operational efficiency while maximising cost and time savings.

Experience and heritage

25 years of expertise

CAFM Explorer boasts over 25 years of development by industry experts with deep domain knowledge.

Cloud pioneers

Idox has supported cloud-based applications for over 20 years, partnering with major public cloud providers such as AWS, Azure, and OCI. You're in safe hands.

All under one roof

As part of our cloud service provision, your technology stack and related applications will be kept fully updated and managed in a safe and secure environment designed for 24/7 operation.

As the developers of CAFM Explorer, we've created an environment for the most effective operation of our products.

Benefits of CAFM Explorer in the cloud

Flexibility

Choose a cloud strategy that can flex to accommodate your company's future growth and needs

Cost efficiency

Lower initial investment with a low-cost delivery solution.

Resource light

Reduce the demand on internal IT teams.

Safe and secure

Enjoy a 24/7 operation in a secure environment.

Stay up to date

Access the latest technology stack, including related applications and the most recent CAFM release.

Scalable

Automatically scale to accommodate peak busy periods and high demand

Sustainable approach

Reduces energy consumption and carbon footprint.

Peace of mind with Idox's
Core IT Services

Robust security protocols

Adheres to stringent policies and procedures, including Cyber Essentials accreditation and ISO27001 compliance, ensuring the highest level of data protection and safeguard against cyber threats.

Business continuity

Our system ensures uninterrupted operations through disaster recovery support and regular backups. In the event of unforeseen disruptions, we have robust mechanisms in place to swiftly restore services and maintain business continuity.

UK-based data centres

Our data centres are strategically located within the UK, ensuring that your data remains close to home. This proximity enhances data transfer speeds, minimizes latency, and complies with local regulations and privacy requirements.

Cost and time savings

Move to the cloud and say goodbye to outdated infrastructure and maintenance headaches. Enjoy streamlined operations, reduced costs, and more efficient use of your valuable time.
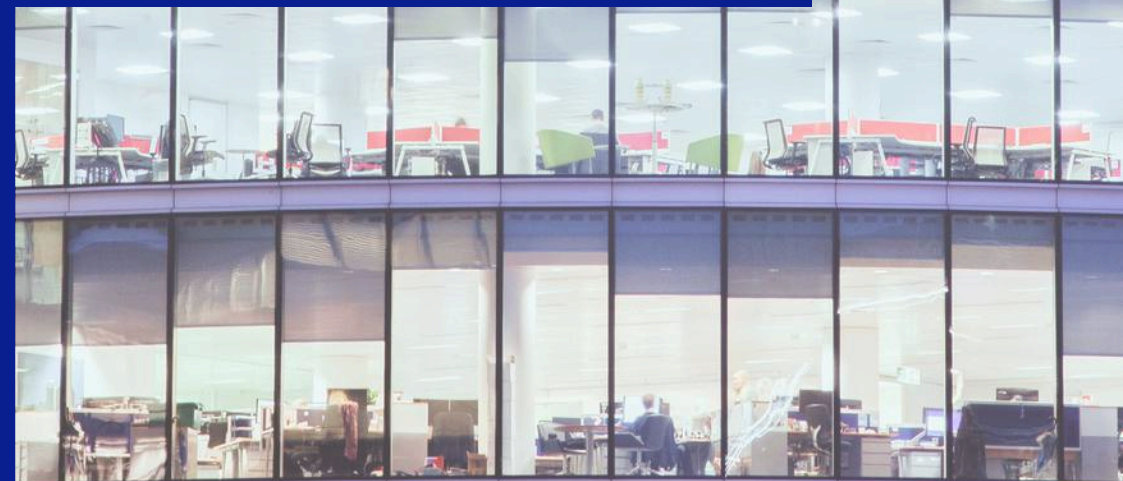

Safety and compliance

Our system boasts certified security and compliance, providing you with peace of mind. Rest assured that your data is protected and handled in accordance with industry standards and regulations.

Confidence

You can rely on our heritage and expertise. With a proven track record and extensive experience, we provide dependable solutions that instil confidence in your operations and decision-making.

Robust and reliable

Our system ensures guaranteed uptime and follows continuity practices. You can rely on seamless operations and uninterrupted services, even during unexpected events.

How it works

Powerful remote servers

Idox has secured robust servers in a UK data centre, pre-configured to support and deliver your CAFM Explorer system. These servers boast an impressive +99% uptime.

Flexible hosting options

Web-based solution

You can host your solution entirely in the cloud, accessible from any device with an internet connection.

Networking efficiency

Geographical difficulties, hardware requirements, and WAN costs are addressed by utilizing a hosted environment.

Save time and money while ensuring smooth operations.

Secure file storage

Cloud technology allows you to store files securely. Easily transfer files between your local machine and the remote cloud desktop.

Instant cost savings

Low-cost delivery solution

No need to invest in internal servers or software licenses.

Strengthening your IT infrastructure is no longer necessary.

All you need is a PC with an internet connection, and the Idox team will take care of the rest.

Say goodbye to outdated infrastructure and embrace a secure, compliant cloud solution.

Move to the cloud without disruption

Our experienced IT teams support you throughout the migration process.
